I aim to secure a challenging role as a Computer Science Engineering graduate in a dynamic organization where I can apply my technical skills, contribute to innovative projects, and expand my knowledge and expertise. I am in search of a professional setting that promotes growth and offers continuous learning opportunities, allowing me to significantly contribute to the rapidly advancing technological domain.

Work Experience

MERN stack developer   Aug 2024 - Present
Intern | Mashuptech ,Infopark Technology Business Center.

Projects

Connect+   Aug 2023 - Dec 2023

Connect+ is a dynamic web application designed to enhance student learning. It provides a range of features including community forums, private messaging, and video conferencing, creating a nurturing environment that promotes academic achievement and prioritizes accessibility.

Image based vitamin deficiency detection using CNN   May 2023 - Apr 2024

A non-invasive approach employs machine learning to analyze images of the eyes, lips, tongue, and nails to detect vitamin deficiencies. This method could serve as a cost-effective and accessible alternative to conventional blood tests for screening purposes.
